The 2017 Tamura Symposium: Lepton and Baryon Symmetry

May 8-9, 2017
POB (ACES) 2.402

Topics include:
Baryogenesis
Leptogenesis
Lepton flavor violation
Neutrino oscillations
Majorana neutrinos
\(\mu\) to e conversion
Sterile neutrinos
\(n\bar{n}\) oscillations
Proton decay
Supernovae

Organizers:
C. Kilic, UT
T. Kishimoto, Osaka U.
K. Lang, UT (Chair)
M. Nomachi, Osaka U.

Speakers:
T. Andeen, M. Aoki, R. Bernstein,
M-C. Chen, W. Flanagan, S. Gardner,
Y. Hayato, M. Koga, A. Ichikawa,
T. Kishimoto, K. Lang, R. Mahapatra,
D. Morrissey, M. Nomachi, O. Palamara,
F. Piquemal, M. Raizen, J. Ritchie,
R. Saakyan, R. Schwitters, P. Shanahan,
J. Urheim, S. Weinberg

Check for details and register at:

Thank you for coming!

- Thanks to the Tamura Fund for supporting this event
- Thanks to the organizing committee
  - Can Kilic
  - Tadafumi Kishimoto
  - Masaharu Nomachi
- Thanks to logistics helpers
  - Carol Monette
  - Eric Patkowski
- Thanks to “scientific secretaries”
  - Will Flanagan, Junting Huang, Marek Proga
  - Dung Phan, Ramon Salazar, Brandon Soubasis, Bea Tapia, Shiv Yadavalli
- Thanks to all the speakers for their excellent talks!
• We hope this was worth your effort
• Remember May 19 - the deadline for finalizing your talks (after then they will become public)
• We will also post some pictures
• Stay in touch!

Bon Voyage!
